

## Start Cleaning, Deodorizing, Sanitizing using just tapwater! Introducing the professional aqueous ozone spray bottle:

The spray bottle offers a risk reducing alternative to all daily chemicals, deodorizers and sanitizers. The spray bottle contains revolutionary and patented technology, an electrolytic cell that turns tap water into Aqueous Ozone (A.O.) – nature's most powerful sanitizer. With a push on the trigger, safe A.O. is created on-demand which is non-toxic, sustainable, eco-friendly and contains no fragrances or dyes.

**A.O. reduces 99,9-99,999% of common bacteria, germs and pathogens in 30 sec - 5min.** With our spray bottle you avoid chemical spills, damages, stock problems, chemical price hikes, reducing logistics and plastic. Only requirements are an electrical outlet to plug our bottle in after 10 tank refills and ordinary tap water. You can refill under every tap, saving time, money and having a huge **People-Planet-Profit impact**.

**1 bottle equals minimum 2.000L of chemicals**, giving a safe PH7 solution what doesn't damage surfaces and gives you the best, user friendly cleaning result leaving no residuals behind. How we clean and sanitize, the ease of cleaning and sanitizing, reducing the footprint, avoiding VOC's and residuals and combating bacteria/viruses(invisible parts) is more important than ever and what the spray bottle revolutionizes.

The spray bottle eliminates the risk of health effects of people with medical issues, danger of wrong chemical use, preventing resistance of disinfectants, using just one bottle with water instead of various chemicals, ensuring hygiene and health. Because of the all-round safer and Detergent Free Cleaning solution instructions are easier to understand for users and gives them the best working quality. It gives a cleaner environment, safer feeling and cleans in a more fun, sustainable and safe way!

### Specifications:

Water Reservoir: 400 ml  
Minimum lifetime: Up to 5.000 refills  
Weight: 900 grams  
Battery: Li-Ion 7.4V 1.8Ah

### Why EnozoPRO?

- Residual-Free and Detergent-Free daily cleaning
- Up to 80% reduction on aggressive chemicals
- No VOC's or cleaning errors
- Using only tap water – 100% safe
